PROJECTS

House Price Prediction using Machine Learning

04/2023 - 06/2023

This project is about finalizing the appropriate house for an individual inclined based on their conditions and requirement. It uses the fundamental Machine Learning perspective for EDA and Data Visualization. It includes an introduction to Linear Regression for continuous data evaluation and modeling using algorithms.

Social Media Sentiment Analysis

07/2023

This project aims to develop a machine learning model for sentiment analysis on social media platforms such as Twitter and YouTube and E-commerce websites like Amazon. Social media plays a pivotal role in shaping people's views and ideas, making it essential to understand the sentiments expressed on these platforms.
